## COLD WEATHER IS HERE!

With cold weather here, paying attention to details during your pre-trip inspection is extremely important. A heightened pre trip inspection is crucial to your success and safety out on the road. Please pay close attention to fluid levels and tire pressure.

**When starting a diesel truck in freezing weather, the key needs to be turned and left for at least 30 seconds before starting.**

**For drivers of natural gas trucks, please install your winter front if it is 32 degrees or less.**

**Watch out for coolant leaks that may be “cold water leaks”. This could be the result of a clamp needing to be tightened. If you see any puddles under the truck, please come back to the shop immediately.**

**Do not add water to the cooling system.**

**Make sure air tanks are drained.**

If you have any questions about cold weather procedures or need assistance, please visit or call the shop. Thanks, and drive safe.
