COLD WEATHER IS HERE!

With cold weather here, paying attention to details during your pre-trip inspection is extremely important. A heightened pre trip inspection is crucial to your success and safety out on the road. Please pay close attention to fluid levels and tire pressure.

When starting a diesel truck in freezing weather, the key needs to be turned and left for at least 30 seconds before starting.

For drivers of natural gas trucks, please install your winter front if it is 32 degrees or less.

Watch out for coolant leaks that may be “cold water leaks”.

This could be the result of a clamp needing to be tightened. If you see any puddles under the truck, please come back to the shop immediately.

Do not add water to the cooling system.

Make sure air tanks are drained.

If you have any questions about cold weather procedures or need assistance, please visit or call the shop. Thanks, and drive safe.

TRUCK CLEANLINESS

Please make sure all trucks are clean and ready to be used at all times. All trash and personal items need to be removed from the truck at the end of your shift. Thank you for your attention to this matter and drive safe.
